

**Amendments to the Claims:**

Please cancel claims 5, 7, 12, 14, 19, and 21 without prejudice or disclaimer. This listing of claims will replace all prior versions, and listings of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method of updating Web pages of an e-commerce storefront, the method comprising:
  - accessing, on a web browser, a Web page out of a plurality of Web pages of an e-commerce Web site over an intranet link the plurality of Web pages of the Web site comprising an electronic catalog of products arranged in a product hierarchy;
  - submitting log in information to the Web site over the intranet link, wherein said log in information is selected from a first log in information to obtain a first privilege level for editing the Web pages and a second log in information to obtain a second privilege level for editing the Web pages, wherein the second privilege level is higher than the first privilege level, and wherein said intranet link is separate from an Internet communication link;
  - invoking a web page editor having a graphical user interface for editing the accessed Web page in response to the submitted log in information having a privilege level sufficient to enable editing of the accessed Web page, wherein the web page editor is invoked on the web browser over the intranet link;
  - selecting an item for sale on the e-commerce website on the Web page to modify, the item having one or more attributes related to the item displayed on the Web page, wherein selecting the item causes the web page editor to display an interface for editing the one or more attributes of the item;

editing the item on the Web page using the graphical user interface to create an updated version of the Web page, wherein editing the item include updating one or more attributes of the item;

submitting the edited item to the Web site over the intranet link;

receiving the updated version of the Web page at a first client over the ~~Internet communication~~ intranet link, the updated version of the Web page displayed the attributes related to the item, including the one or more updated attributes; ~~and~~

displaying the updated version of the Web page on the web browser of the first client;

viewing the updated version of the Web page using the web browser on the first client to verify the appearance of the edited item, the appearance being the same as the appearance to a standard user accessing the updating version of the Web page; and

in response to the login information comprising the first login information, generating a workflow notification to request an approval of the updated version of the Web page from a user having said second privilege level, wherein the updated version of the Web page is not provided over the Internet communication link until the approval is obtained.

2. (Previously Presented) The method of Claim 1, further comprising logging into the Web site with an authentication to obtain privileges for modifying Web pages of the Web site.

3. (Previously Presented) The method of Claim 2 further comprising logging out of the Web site prior to receiving the updated version of the Web page.

4. (Canceled).

5. (Canceled)

6. (Canceled)

7. (Canceled)

8. (Currently Amended) A computer system comprising a processor coupled to a memory, wherein said memory comprises instructions that when executed on said processor implement a method of updating Web pages of an e-commerce storefront, the method comprising:

accessing, on a web browser, a Web page out of a plurality of Web pages of an e-commerce Web site over an intranet link the plurality of Web pages of the Web site comprising an electronic catalog of products arranged in a product hierarchy;

submitting log in information to the Web site over the intranet link, wherein said log in information is selected from a first log in information to obtain a first privilege level for editing the Web pages and a second log in information to obtain a second privilege level for editing the Web pages, wherein the second privilege level is higher than the first privilege level, and wherein said intranet link is separate from an Internet communication link;

invoking a web page editor having a graphical user interface for editing the accessed Web page in response to the submitted log in information having a privilege level sufficient to enable editing of the accessed Web page, wherein the web page editor is invoked on the web browser over the intranet link;

selecting an item for sale on the e-commerce website on the Web page to modify, the item having one or more attributes related to the item displayed on the Web page, wherein selecting the item causes the web page editor to display an interface for editing the one or more attributes of the item;

editing the item on the Web page using the graphical user interface to create an updated version of the Web page, wherein editing the item include updating one or more attributes of the item;

submitting the edited item to the Web site over the intranet link;

receiving the updated version of the Web page at a first client over the ~~Internet communication~~ intranet link, the updated version of the Web page displayed the attributes related to the item, including the one or more updated attributes; ~~and~~

displaying the updated version of the Web page on the web browser of the first client;

viewing the updated version of the Web page using the web browser of the first client to verify the appearance of the edited item, the appearance being the same as the appearance to a standard user accessing the updating version of the Web page; and

in response to the login information comprising the first login information, generating a workflow notification to request an approval of the updated version of the Web page from a user having said second privilege level, wherein the updated version of the Web page is not provided over the Internet communication link until the approval is obtained.

9. (Previously Presented) The computer system of Claim 8, further comprising logging into the Web site with an authentication to obtain privileges for modifying Web pages of the Web site.

10. (Previously Presented) The computer system of Claim 9 further comprising logging out of the Web site prior to receiving the updated version of the Web page.

13. (Canceled)

14. (Canceled)

15. (Currently Amended) A computer readable media having computer readable instructions embodied therein for causing a computer system to perform a method of updating Web pages of an e-commerce storefront, the method comprising:

accessing, on a web browser, a Web page out of a plurality of Web pages of an e-commerce Web site over an intranet link the plurality of Web pages of the Web site comprising an electronic catalog of products arranged in a product hierarchy;

submitting log in information to the Web site over the intranet link, wherein said log in information is selected from a first log in information to obtain a first privilege level for editing the Web pages and a second log in information to obtain a second privilege level for editing the Web pages, wherein the second privilege level is higher than the first privilege level, and wherein said intranet link is separate from an Internet communication link;

invoking a web page editor having a graphical user interface for editing the accessed Web page in response to the submitted log in information having a privilege level sufficient to enable editing of the accessed Web page, wherein the web page editor is invoked on the web browser over the intranet link;

selecting an item for sale on the e-commerce website on the Web page to modify, the item having one or more attributes related to the item displayed on the Web page, wherein selecting the item causes the web page editor to display an interface for editing the one or more attributes of the item;

editing the item on the Web page using the graphical user interface to create an updated version of the Web page, wherein editing the item include updating one or more attributes of the item;

submitting the edited item to the Web site over the intranet link;

receiving the updated version of the Web page at a first client over the ~~Internet communication~~ intranet link, the updated version of the Web page displayed the attributes related to the item, including the one or more updated attributes; ~~and~~

displaying the updated version of the Web page on the web browser of the first client;

viewing the updated version of the Web page using the web browser of the first client to verify the appearance of the edited item, the appearance being the same as the appearance to a standard user accessing the updating version of the Web page; and

in response to the login information comprising the first login information, generating a workflow notification to request an approval of the updated version of the Web page from a user having said second privilege level, wherein the updated version of the Web page is not provided over the Internet communication link until the approval is obtained.

16. (Previously Presented) The computer readable media of Claim 15, further comprising logging into the Web site with an authentication to obtain privileges for modifying Web pages of the Web site.

17. (Previously Presented) The computer readable media of Claim 16 further comprising logging out of the Web site prior to receiving the updated version of the Web page.

18. (Canceled)

19. (Canceled)

20. (Canceled)

21. (Canceled)

Please add the following new claims:

22. (New) The method of claims 1, further comprising:  
receiving the updated version of the Web page at a second client over the intranet link;  
displaying the updated version of the Web page on the web browser of the second client; and  
receiving over the intranet link the approval of the updated version of the Web page from the user having the second privilege level.

23. (New) The method of claim 22, further comprising providing the updated version of the Web page over the Internet communication link in response to the approval of the updated version of the Web page from the user having the second privilege level.

24. (New) The computer system of claims 8, further comprising:  
receiving the updated version of the Web page at a second client over the intranet link;

displaying the updated version of the Web page on the web browser of the second client; and

receiving over the intranet link the approval of the updated version of the Web page from the user having the second privilege level..

25. (New) The computer system of claim 24, further comprising providing the updated version of the Web page over the Internet communication link in response to the approval of the updated version of the Web page from the user having the second privilege level.

26. (New) The computer readable media of claims 15, further comprising:  
receiving the updated version of the Web page at a second client over the intranet link;

displaying the updated version of the Web page on the web browser of the second client; and

receiving over the intranet link the approval of the updated version of the Web page from the user having the second privilege level..

27. (New) The computer readable media of claim 26, further comprising providing the updated version of the Web page over the Internet communication link in response

Appl. No. 10/071,945

PATENT

Amdt. dated June 7, 2010

Reply to Office Action of April 7, 2010

Amendment under 37 CFR 1.116 Expedited Procedure

– Examining Group 3694

to the approval of the updated version of the Web page from the user having the second privilege level.
